

**THIS HOLDER IS NOT INTENDED FOR USE ON
WINDOWS WITH EMBEDDED WIRE DEFROSTERS!**

*Your Rugged Gear
Suction-Cup
Holder Will
Provide Years of
Service Only If You*

Follow these Important Care Instructions!

**Suction Cups are not intended
for permanent installation!**

You must **remove Suction Cups from the window every few weeks** to allow them to regain their original shape. (Use the easy-release tabs.) If cups are not removed periodically, they may not return to their original shape and will lose their suction/holding properties.

Prior to re-mounting the Holder, wash the surface and, if necessary, warm the window and cups to at least 60°.

The Suction-Cup mount system provides removable, re-mountable convenience with the proper care. Occasionally replacement suction cups are necessary. To purchase replacements, or for more information on this or any Rugged Gear product:
